Managements' Discussion and Analysis

Industry sector and development

Your Company is involved primarily in three areas of business, namely Aluminium, Minerals and Wind Power Generation. The year 2013-14 has shown growth in all individual three areas of business of the Company and the coming year promises even better growth as compared to previous year.

Aluminium division of the Company has shown a growth in production as well as in sales & we hope in coming year even better in the electrical sector where most of the aluminium product made by the Company is used.

In the mineral sector your Company also showed a good growth and trying to look for more sources of mineral, because at present Company has restricted exposure in the business of bauxite only.

During the year 2013-2014, the Company installed two solar power plants of 100 KWP & 525 KWP each and also has two Wind Turbine Generators and all are working well.

Opportunities

The Indian power sector is one of the most diversified in the world. Sources for power generation range from commercial sources such as coal, lignite, natural gas, oil, hydro and nuclear power to other viable non-conventional sources such as wind, solar, and agriculture and domestic waste. The demand for electricity in the country has been growing at a rapid rate and is expected to grow further in the years to come. India, now has a stable new Government in center and we hope Indian economy will grow fast with the new estimation of GDP 6% during the year 2014-2015. In power sector new Govt. is taking all steps to provide 24 hours electricity to all. In order to meet the increasing requirement of electricity, massive addition to the installed generating capacity in the country is required. So we continue to remain positive on opportunities in the power sector. Our analysis of proposed / ongoing infrastructure projects indicates that the strong order inflow momentum would continue in this sector.

Major threats

While significant investments are planned by the Government of India, there has always been a lag in the planned investments and in the actual implementation and execution of those investments. The Company operates in a highly competitive environment and most orders in India are finalized through the tendering process. While the Company is well placed in this segment, with increased competition realizations may be hit going forward.

In the mineral area there are always certain issues like local environment, Govt. policies which are difficult to predict and can become an impediment in the working of this division.

Segment-wise performance.

The Aluminium Product division has reported an increase in its total revenue from Rs.427.69 crores to Rs.434.04 crores. This is primarily on account of increased in Conductors sold.

The mining business division has reported an increase in its total revenue from Rs.2.98 Crores to Rs.5.21 Crores in the previous year, which is from trading in bauxite.

The company has two Wind Turbine Generators of 1.25 MW & 1.50 MW each and two Solar Power Plants of 100 KWP & 525 KWP each. All are working well and contributed Rs.2.51 Crores in the total revenue of the Company.

Outlook

As mentioned in the earlier paragraph with the government initiating investments in the power sector there seems to be a positive outlook for our products. We also hope to significantly expand our Bauxite operations in the coming year.

Risk and concern

As always, volatility in the price of aluminium will affect the performance of the aluminium division. The mineral division will always be subject to commodity prices fluctuation as well as local issues.

Internal control system and their adequacy

The entire facility of both Wire Rods as well as Conductor manufacturing are ISO certified. Your Company has a real time system of monitoring its targets as well as expenditure. Your Company has been externally rated by CRSIL as CRSIL BBB+ . This has infused great confidence in the bankers of the Company.

Performance

Your Company has constantly trying to increase its sales as well as profitability. The year 2013-2014 was no exception. We are optimistic that this trend will continue in future too.

Development in human resource / industrial relations

The company places high importance on the development of its human resources. It imparts regular training to its employees to make them more focused to adapt to the constant change in the business environment. Industrial relation in both the units was satisfactory.
